

John Fuller

Frontend Developer

johnathanfuller0@gmail.com | github.com/JohnFull30 | linkedin.com/in/john-fuller-03044322a

Summary

Frontend developer building clean, responsive, product-focused web and mobile experiences.

I design and build modern interfaces with React, Material UI, SwiftUI, and product thinking.

Featured Projects

HabitSquares - SwiftUI habit tracker connecting Apple Reminders with visual progress tracking.

Holistic Herbs - E-commerce experience using React, Material UI, Supabase, and product browsing flows.

GoTobago Tours - Responsive travel product concept for tours, local context, and booking intent.

Gender Reveal Countdown - Polished countdown app/demo with event-driven interaction.
